Questionnaire: Week 2 (9/8) Assignment
Name:王世璿
Student ID:b14505006

Instructions

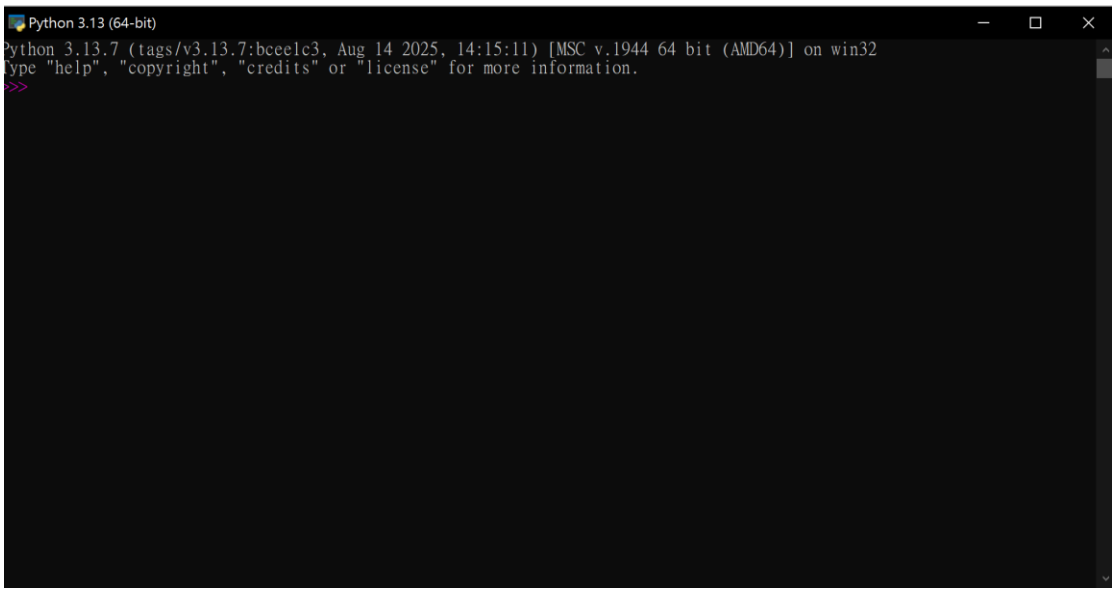
- Please complete all questions below.
- Include a **screenshot** for each question as proof of your setup or execution results.
- Responses may be provided in **either Chinese or English**.

Section A. Python Installation

Q1. Please install Python on your computer.

- Which version or distribution of Python did you choose (e.g., Python.org, Anaconda, or another distribution)?
  - Python.org
- After installation, how do you check the version of the installed distribution? *(Please attach a screenshot.)*
  - 
Section B. Terminal Execution

Q2. After installation, can you run python.exe directly in **Terminal Mode**? *(Please attach a screenshot.)*

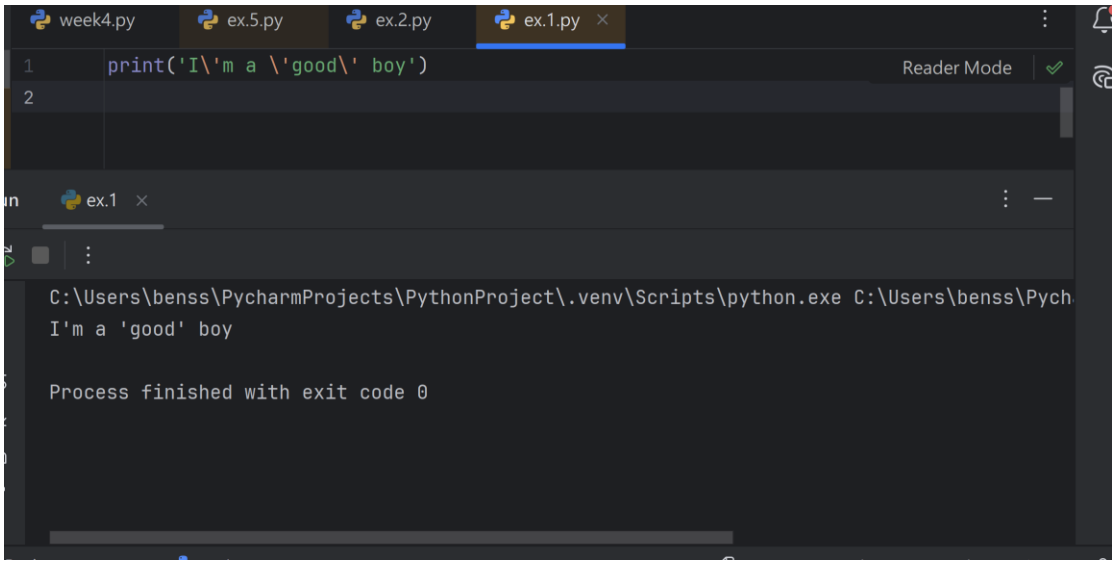


- If not, what is the solution?
- Please search online for possible fixes.

Section C. Development Environment

Q3. Please install a **Python Integrated Development Environment (IDE)**.

- Which IDE did you choose? *(Please attach a screenshot.)*
  - *Pycharm*
  - 
Q4. In the IDE, run one example exercise from your textbook and verify the result.



Section D. Debugging and Error Handling

Q5. Intentionally create a program error. *(Please attach a screenshot.)*

- Describe the error message displayed during execution.
- Explain how the error message relates to the mistake you made.
-

- 字串未終止
- Hello 之後沒有寫”
