Exercise 5-1.

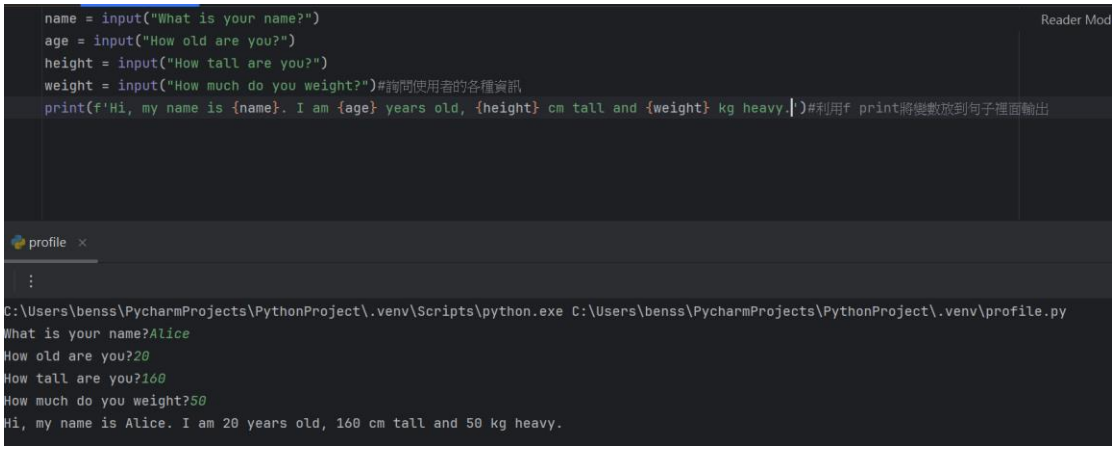
請寫一個 **Python** 程式 **`profile.py`**，功能如下：

1. 使用 **`input()`** 詢問使用者的以下資訊：
    - 姓名、年齡、身高、體重
2. 將這些資訊用 **`f-string`** 格式化，輸出成一段完整的句子如下：

Hi, my name is {Name}. I am {Age} years old, {height} cm tall and {weight} kg heavy.

(輸出如下)

```
None
What is your name? Alice
How old are you? 20
How tall are you (in cm)? 160
How much do you weigh (in kg)? 50
Hi, my name is Alice. I am 20 years old, 160 cm tall and 50 kg heavy.
```



Exercise 5-2.

請寫一個 **Python** 程式 **`notebook.py`**，功能如下：

1. 讓使用者在執行程式時，透過 命令列參數 (**`argv`**) 指定要讀取的檔案名稱。
    - 執行方式：**python notebook.py notes.txt**
2. 程式會開啟該檔案並印出內容。
3. 再次詢問使用者，輸入另一個檔名（用 **`input()`**），然後讀取並印出該檔案的內容。

(輸出如下)

```
None
$ python notebook.py notes.txt
Here's your file notes.txt:
This is my first note.
I love Python!

Type the filename again: diary.txt
This is my diary.
Today I learned about argv and input.
```

```python
from sys import argv
script, filename = argv

print(f"Here is your file {filename}:")
print(open(filename).read())#開啟notes.txt並讀取

filename2 = input("Enter the file name again: ")#詢問檔案名稱
print(open(filename2).read())#開啟檔案
```

```
(.venv) PS C:\Users\benss\PycharmProjects\PythonProject\.venv> python notebook.py notes.txt
Here is your file notes.txt:
This is my first note.
I love Python!
Enter the file name again: diary.txt
This is my diary.
Today I learned about argv and input.
```
